NYSE: JPM FINANCIALS · BANKS

JPMorgan Chase & Co. [1,2]

NEW YORK CITY, NEW YORK, UNITED STATES · FOUNDED 1799 · 318,512 EMPLOYEES

JPMorgan Chase is a diversified banking leader, ranking first in global investment-banking fees with 9.2% year-to-date wallet share in 3Q26. Third-quarter net income rose 6% to $15.3 billion, alongside 13% growth in net interest income and 15% growth in Markets revenue. The stock debate is whether this broad-based growth can sustain earnings momentum as expenses rise faster than managed revenue and credit costs remain material. [3,4]

> JPMorgan Chase provides deposit, lending, mortgage, auto, card, payment and investment products to consumers and small businesses. It offers investment banking, lending, payments, markets, custody and securities services to corporate and institutional clients, as well as investment management for institutional and retail investors and private banking for high-net-worth clients. [3]

CEO or CFO change, 12 mo [12,13]	NO	Material legal matter [14,15]	YES

Bull case

Medium confidence · jpmorganchase.com

01 Balance-sheet growth is supporting core income: 3Q26 net interest income excluding Markets rose 6% to $24.7 billion, driven by higher deposits, card balances and wholesale loans despite lower rates. [4]

02 The institutional franchise is expanding: Markets revenue rose 15% to $10.3 billion and investment-banking fees increased 14%, supporting JPMorgan's leading global fee position. [4]

03 Asset and wealth management adds another growth engine: 3Q26 revenue rose 14% to $6.9 billion and net income increased 11% to $1.8 billion, supported by higher market levels and strong net inflows. [4]

Bear case

Medium confidence · jpmorganchase.com, finance.yahoo.com

01 Costs are outpacing revenue: 3Q26 expenses increased 12% to $27.3 billion, versus 8% growth in managed revenue, reflecting compensation, technology and marketing spending. [4]

02 Earnings fell short of expectations: reported EPS of $5.57 missed $5.93 consensus, with $658 million of investment-securities losses reducing EPS by $0.18. [4,16]

03 Credit costs remain material: 3Q26 provisions totaled $2.7 billion, including a $539 million net reserve build primarily in Wholesale, although net charge-offs declined year over year. [4]

Key risks

Medium confidence · jpmorganchase.com

01 Adverse economic conditions and market volatility could hurt earnings and investment positions, with management recently highlighting sticky inflation, large fiscal deficits, rising… [4,8]

02 Borrower or counterparty deterioration could increase credit-loss allowances and charge-offs, reducing earnings across consumer and wholesale lending. [8]

03 Regulatory capital requirements could constrain business activity and shareholder distributions, while litigation and penalties create additional financial exposure. [8]

04 Cyberattacks, data breaches or failures of internal and third-party operational systems could disrupt services and materially harm the firm and its clients. [8]

Recent developments

Last 90 days. Medium confidence · am.jpmorgan.com, jpmorganchase.com

2026-10-22 — **Tokenized funds add Solana access** [17]
J.P. Morgan Asset Management made its MONY and JLTXX tokenized money-market funds available on Solana to qualified U.S. investors, broadening access to its on-chain cash-management platform.
